

## **Financial Management Module**

### **AIM:**

The module is designed to enable the learners to develop a critical understanding and application of Financial Management skills, theory and practice with the view of personal transformation, so that learners will be accountable, transparent and have integrity in their responsibilities either at domestic or organisational level or both.

### **OBJECTIVES:**

By the end of the module learners should be able to:

1. Critically dissect and assess current theories and concepts of Financial Management.
2. Demonstrate a profound knowledge of stewardship, accountability and transparency.
3. Examine ways of ensuring internal controls both at family and organizational levels.
4. Produce and interpret financial statements.
5. Draft and evaluate project proposals.
6. Demonstrate critical skills in risk analysis and financial forecasting and planning.
